

Pharmatech Company for Drugs and Medical Supply Company Presentation

The Company

About Us

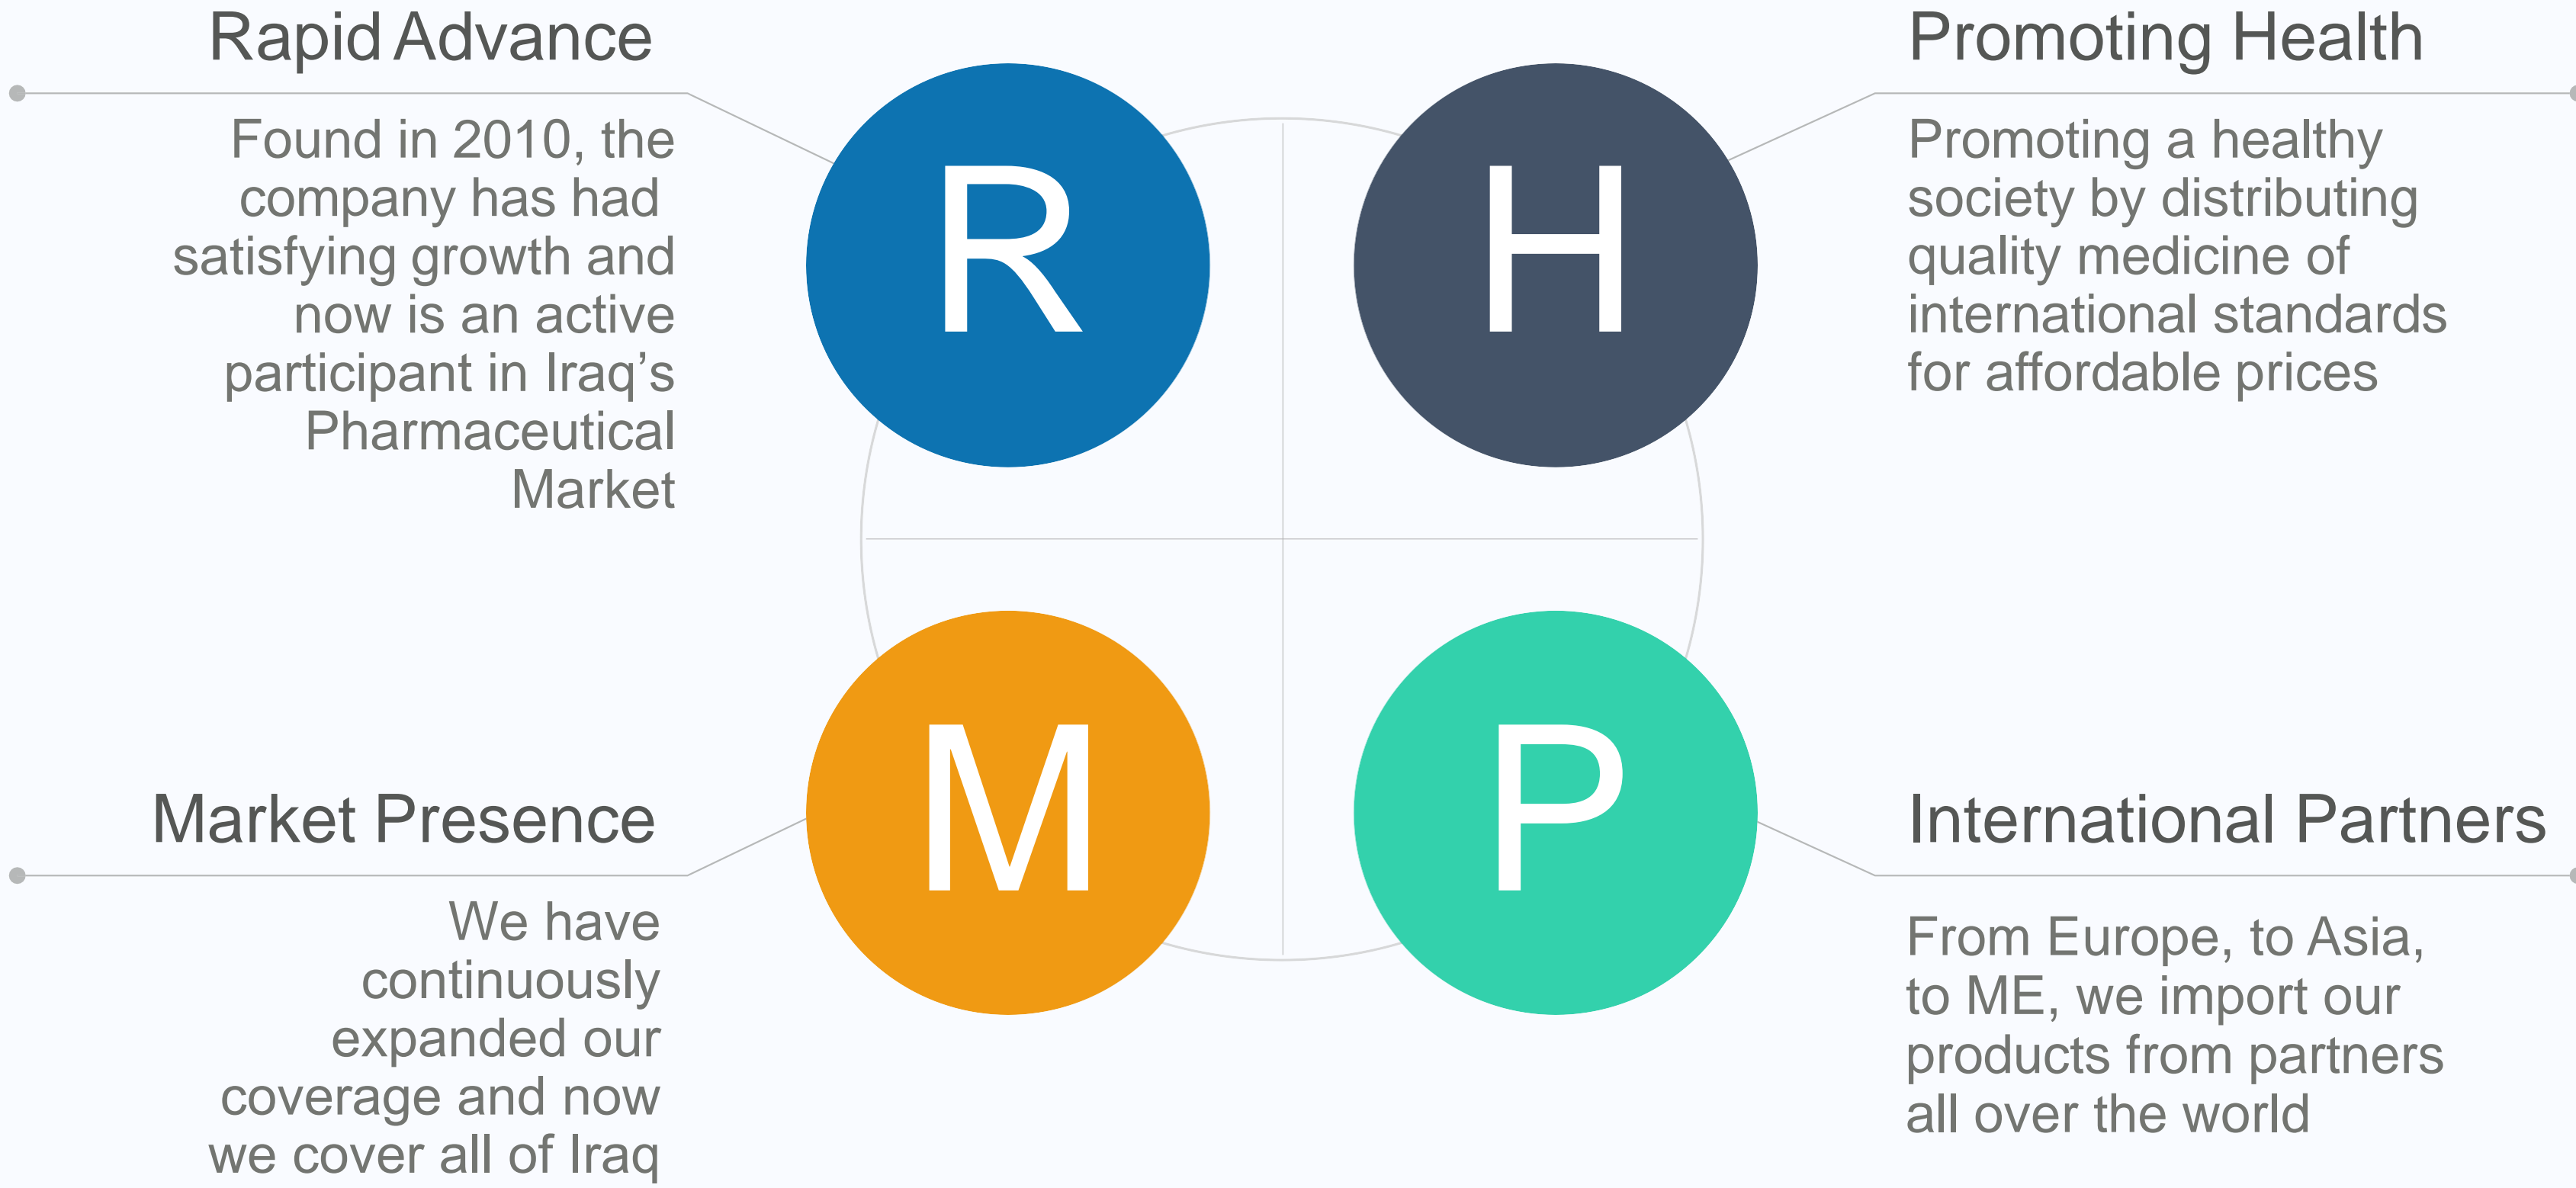

Pharmatech Company for Drugs and Medical Supply is dedicated to providing the best medication for the people of Iraq. With European, Asian, and Middle Eastern brands, and more brands currently in negotiation, we have chosen to work with excellent pharmaceutical manufacturers around the world.

Formed in 2010, we aimed to have a positive impact and help in building a healthier society. We thus set out to find quality medicine for affordable prices and started making partnerships with excellent manufacturers around the globe. Our efforts in the past decade have led to a rich portfolio of more than 200 products catering to a wide range of medical needs.

We deal with some of the most important pharmaceutical wholesalers across the country. Our goal is to expand our coverage, build partnerships with more manufacturers, and become one of the top providers of pharmaceutical products in Iraq's pharmaceuticals market.

Overview

Most important facts

Rapid Advance

Found in 2010, the company has had satisfying growth and now is an active participant in Iraq's Pharmaceutical Market

Promoting Health

Promoting a healthy society by distributing quality medicine of international standards for affordable prices

Market Presence

We have continuously expanded our coverage and now we cover all of Iraq

International Partners

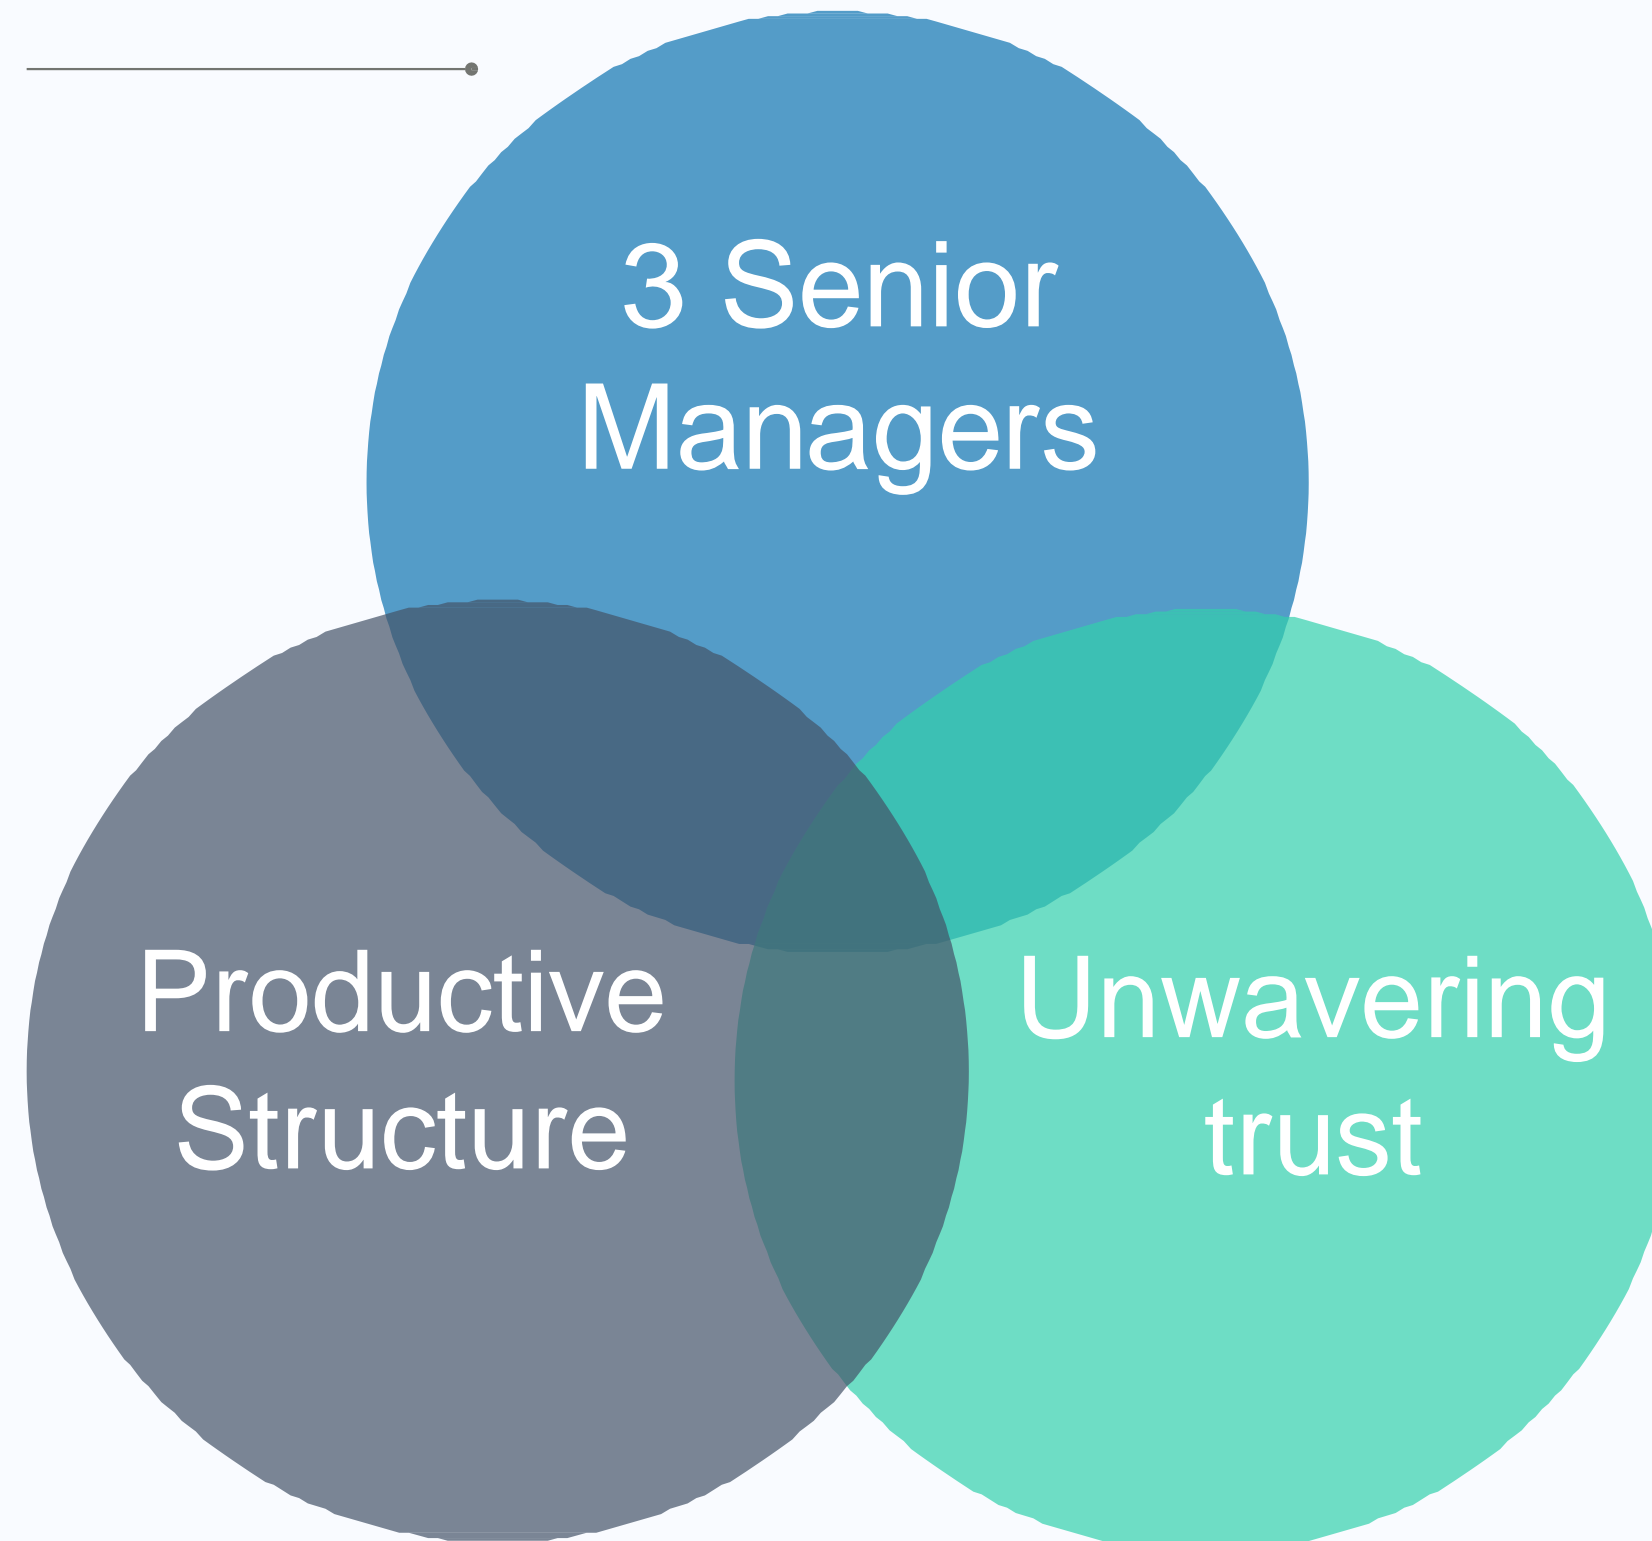

From Europe, to Asia, to ME, we import our products from partners all over the world

The Staff

The Heart and Soul of the Company

Empowering Leaders

With an average of 15 years of experience in this business, the 3 senior managers work restlessly to lead the company forward towards success

Company Structure

The staff are distributed in a way that everyone fulfills their role and yet there is continuous cooperation

Brothers & Sisters

The core staff are not only co-workers, but a family who work together for the success of all

Nation-wide coverage

Distributing to all Governorates

Market Presence

Since its formation in 2010, the company has grown steadily. We established our second branch in Baghdad in 2017 for better control in central Iraq. And now, our ~90 representatives are proportionally distributed throughout the biggest Iraqi Governorates and deal with drug stores across the country.

Why Iraq?

Iraq has only a few local pharmaceutical manufacturers which produce limited products. This is why many international manufacturers of medicine are interested in the huge Iraqi pharmaceutical market, which caters for the needs of more than 40 million people, most of those needs being unmet, yet!

Partnership

We can handle and provide regulatory affairs' services to our valuable partners who are in need in terms of company and product registrations, and we are looking for new partners to expand on our vision and mission even more. Please feel free to send us your queries and suggestions.
